

SP Roll handling

Horizontal and vertical handling of 4000kg rolls – LPE240

Description

- Based on BT lowlifter LPE240
- 4000 kg handling of rolls
- Rolls lifted onto the forks by crane
- Fork design for horizontal and vertical transportation of the rolls

Technical Information

- Rolls of diameter 1400/1520, length 1400/1520mm
- Travelling speed with/without load 4,5/9 km/h
- Battery exchange towards the side

Applications

- Suitable for roll handling where both vertical and horizontal handling is needed
- The rolls are lifted onto the machine by overhead crane. Not possible to take rolls from the floor with this application solution
